
PHASE 1 → “Warm-up Mode” (Day 1–7)

Focus: Git, GitHub, workflow, confidence.

DAY 1: Git Basics – Ground Zero

- Install Git
- Learn: repo, commit, branch
- Commands:
 - `git init`
 - `git add .`
 - `git commit -m ""`
 - `git status`
- Make a dummy folder, commit kuch bhi.

Goal → Commit karna instinct ban jaaye.

DAY 2: GitHub Setup

- Create GitHub account
- Setup SSH key (important)
- Make your first repo
- Push code using:
 - `git remote add origin`
 - `git push`

Goal → GitHub se dosti.

DAY 3: Fork → Clone → Branch

Practice:

- Kisi public repo ko fork kar
- Clone kar

- git checkout -b feature-1
- Ek file me “Hello Open Source” likh
- Commit → Push → PR create

Goal → PR creation ka pura flow samajhna.

DAY 4: README Contribution

Docs improvement practice.

- 2 random repos dhund
- Typos fix or formatting improve
- 1–2 PR raise

Goal → Small yet real contributions.

DAY 5: Markdown + Basic Docs

- Learn headings, lists, tables, code blocks
- Apna GitHub profile README bhi banade 😊

Goal → Docs = super high-demand skill.

DAY 6: GitHub Issues

- Learn issue labels:
 - good-first-issue
 - help wanted
 - documentation
- Pick 1 issue from any repo
- Ask maintainer: “Can I work on this?”

Goal → Communication skill.

DAY 7: Conflict Resolution

You learn:

- merge vs rebase
- git pull
- conflict milne par modify → add → commit

Goal → Avoid panic later 🤖

⚙️ PHASE 2 → “Real Contributor Mode” (Day 8–15)

Real PRs → Real projects → Real feedback.

DAY 8: Choose Your Domain

Pick 1–2 areas:

- Java
- Node/Express
- Web dev
- Docs
- DSA repos
- Utility tools

Goal → Random nahi, focused contribution.

DAY 9: Discover Beginner Projects

Find 3 repos jo tumhare domain me active ho:

- Stars 100–3k
- Issues regularly open/closed
- Friendly maintainers

Goal → Acha workspace dhundna.

DAY 10: First Meaningful PR

Pick a simple code issue:

- Improve error handling
- Add simple feature
- Clean code
- Add comments

Goal → Code contribution ka taste.

DAY 11: Learn to Read Codebases

Activities:

- Folder structure samajh
- package.json / pom.xml dekho
- Understanding flow: input → processing → output

Goal → Large projects fear khatam.

DAY 12: API-based Contribution

If doing web:

- Add new route
- Improve response
- Add validation
- Fix bug

Goal → Functional PR.

DAY 13: Testing Basics

Learn:

- Jest (JS) / JUnit (Java)
- Write 1 small test case
- Fix 1 broken test in repo

Goal → Premium contributor mode.

DAY 14: 3 meaningful PRs

Target:

- 1 doc change
- 1 small bug
- 1 code improvement

Goal → Maintain pace.

DAY 15: Interact with Maintainers

Message politely:

- “Can you review my PR?”
- “Should I improve something?”

Goal → Gain visibility.

PHASE 3 → “Serious Contributor Mode” (Day 16–24)

Ye stage me tum real OSS contributor ban jaoge.

DAY 16: Advanced Git

Learn:

- stash
- cherry-pick
- revert
- interactive rebase

Goal → Expert-level operations.

DAY 17: Refactor Contribution

Pick improving areas:

- Better variable names

- Remove dead code
- Split huge files
- Optimize algorithm

Goal → Project maintainers' favorite PR type.

DAY 18: Feature Work

Pick a "medium issue":

- Add new endpoint
- Add new UI component
- Add new config
- Improve security check

Goal → Real-world impact.

DAY 19: Handling Reviews

Learn:

- squashing commits
- responding to review comments
- updating PR

Goal → Professional workflow feel.

DAY 20: Create Your Own Open Source Project

Build something small:

- URL shortener
- Notes API
- Basic portfolio template
- Java utility library

Goal → Start receiving PRs.

DAY 21: Write Good Issues

Learn:

- Bug report
- Feature request
- Clear description + steps

Goal → Communication XP + community growth.

DAY 22: Documentation Writing Skill

Write:

- Contribution guide
- Setup steps
- Code explanations

Goal → Become valuable contributor.

DAY 23: 5 PRs Week Challenge

Complete:

- 2 docs
- 2 bugs
- 1 feature

Goal → High momentum.

DAY 24: Join Discord/Slack Channels

Join:

- GSSoC
- EddieHub
- GirlScript
- OpenCode
- MLH

Goal → Community presence.

PHASE 4 → “GSSoC / GSOC Ready Mode” (Day 25–30)

Ye final polish stage.

DAY 25: Identify 2–3 Big Projects

Examples:

- LinkFree
- Public APIs
- GirlScript repos
- Java algorithms repos
- Node boilerplates

Goal → Target selection.

DAY 26: Read Their Codebase

Look for:

- Architecture
- Modules
- How PRs get accepted
- Active issues

Goal → Fit in like a pro.

DAY 27: Fix a Medium Issue

Choose:

- Logic bug
- Security patch
- Performance fix

Goal → High-value contribution.

DAY 28: Start Consistent Streak

Every day:

- Pick issue → PR
- 30 min reading
- 30 min coding

Goal → Become reliable contributor.

DAY 29: Build Your Contributor Profile

Update:

- GitHub README
- LinkedIn post
- Pin top contributions
- Add badges (GSSoC, PR streak, etc.)

Goal → Attractive profile for programs.

DAY 30: Apply to GSSoC / GSOC Programs

- Fill forms
- Join org channels
- Introduce yourself
- Start contributing

Goal → You're officially in the OSS game 🎉🔥

✅ **If you want, I'll also create:**

- ✓ Daily "to-do list"
- ✓ Google Sheets progress tracker
- ✓ Beginner-friendly repo list

- ✓ Starter PR ideas
- ✓ How to write perfect LinkedIn posts for OSS
- ✓ And a separate roadmap for GSSoC specifically

Just tell me **“Make my tracker”** or **“Give me repos”**.
